Beekeeping in Kenya

Honey mostly contains sugars (80-85%) that are easily absorbed by the body (good for young, old and sick) Honey is made from nectar which is a sugary secretion of flowers Nectar contains 70-80% water To make honey the bees add enzymes and reduce the water content to that of honey (good honey contains less than 19% water)

VIRKON Background Information - Fisher Scientific

Virkon Background Information Page 10 To all intents and purposes, we still have no way of curing any known viral disease Despite 30 years of work, all we can do for the common cold is to suggest aspirin and warm drinks, ie leave the body to fight on its own and provide what support we can (In fact, giving aspirin lowers the body's temperature and makes it easier for the virus to survive)

Apiguard - Frequently Asked Questions

15 Q: I used Apiguard in the spring and my colony seems very small, why? A: It could be that the queen stopped egg laying for a short while This doesn't often happen but if it does, it is a temporary effect only She will resume egg laying when the thymol odour is dissipating, after around 3 weeks, with no damage to the colony or to the

Getting rid of that "homebrew Taste" Oh

Make sure the temperature of the ferment is right, 17-18°C for ales, 8-12°C for lagers An ale fermented at temperatures of 25°C or warmer will contain fusels and other undesirable compounds from the hot ferment that will make the beer have unpleasant off-tastes
